- Thank you so much professor for being such encouragement. It really helped me grow.
- bye bye
- N/A
- Prof, thank you so much. I did write a journal on this subject, which describes my feelings and thoughts about this course. I enjoy it. It is totally different from what I and my friends think about philosophy. Philosophy is enjoyable and mind-opening. I never regret taking this course. Thank you so much. I hope to take your class in the future :)
- Professor Herman is a qualify and good Professor who can teach the courses clearly and I hope he will teach the same courses in the future.
- None
- no idea
- For me this course was a very wonderful learning experience. I learned to see things from different perspectives. All my life I just learned what to think but after taking this course I learned how to think.
- wonderful job !! am really happy that toke this course.
- Dear Professor, I enjoyed the course very much to be honest.I expect to take more courses from you.I was heartbroken to see you did not offer any UG3-4 courses for the spring semester.Please offer more higher level courses so everybody gets a chance to attend your classes. I am feeling very scared on the overall situation of talented professors leaving auw its very disturbing to me.I hope this case will never happen for you.If it happens you should know we will always be by your side. Thank you very much for offering this course and broadening the perimeter of our knowledge.
- I really like the professor. He is the best. He is like a role model both personality as a professional person and academically as a professor.
- You are a very organized, caring and responsible professor. That's what makes me feel good to study in your class. However, I always feel there is lack of depth in the discussion in class. I don't feel stimulated by your questions and the way you explain things in class although I love philosophy. I wonder what is missing from your lecturing style that doesn't satisfy me. I guess probably the way you say things might be too broad and general. And you give students so much time to share their opinions on the quotes which limits your own time of lecturing. I see the need to hear your analysis to learn from you as you are experienced. I and my friends, as young people, have similar ideas, therefore, we tend to think similarly. As a result, I do not learn anything new. I hope you will show your analysis of the quotes more in the next batch taking this course. Thank you very much for your effort!

- Dear Professor, I congratulate you and thank you for being one of the most sincere teacher I had in my life. I find you very sincere to your work and you enjoy your job, that is very important to keep a positive energy in the class. I am truly inspired by your teaching style, you know how to keep your students engaged and keep them awake :) Videos you showed add flavor to this class and our learning. And you coming to class always being prepared is one of the other very strong qualities you have. The time you spend on giving feedback to the students is amazing. When I got my first paper back I was amazed by the time and efforts you put in checking it. You also look very professional yet very friendly in class, it is nice when you crack jokes in the middle of the lecture or discussion. The only thing I would suggest is about the debate we had, next time when you have such debates you might want them to be more formal and the duration can be of two classes. Thanks a lot for being so supportive and encouraging and please don't leave AUW. AUW needs Professors like you. And this I am requesting from my heart, the rate of Professors leaving is very scary. Please, bear with us... please...

- He is a good teacher and does stimulate new ideas, concepts and approaches to the issues discussed in class. Even though he is not a philosophy teacher, he tried really hard to make us understand. He also tried hard to do a good job and he did.
