- I would love to take other courses with the Prof.Salton. He is amazing and so is his teaching method. He is unbiased, with a vision of people to learn more. challenge ideas.
- The course is very interesting and different. The professor is an excellent teacher and always there to help students. It would have better if we could have the class twice a week. We could have more interesting discussions.
- You are an excellent professor
- This is one of the best courses I have ever taken. Professor created an environment in this class that taught me the true meaning of leader. As AUW dreams of creating future leaders, this course can be a course that all the student can take who are interested in becoming leaders in the future. It will help a lot. Very well done, Professor Salton!
- He is an outstanding professor.
- Again, I have to say you are a perfect and excellent professor. Just one comment, this course was really heave because we only have 2 heavy papers one presentation, but still we left with one in-class exam. It is actually a good way to evaluate students, but it is just stressful somehow. Besides, the presentation sometimes is boring. But, overall, I would rate you as a superb professor.
- The reading materials of this course are very effective. Professor is excellent and he tries hard to make sure that every student understands what he is saying in the class.
- he clears the concepts and strategies very well
- He is excellent, and really managed to teach a concept that is difficult to articulate and define.The variety of topics covered was great while still managing to bring out the core of the course. I feel the course could be improved if the instructor pushes/stimulates the students to higher intellectual efforts and quality of work.
- 1. Would have been better if factual knowledge of the subject matter were more clearly mentioned 2. The participation grade should not have been set very high in a very large class like this. 3. Should have provided good and honest comments on the drafts to improve in the final version of the paper because telling everything is fine and accurate in the draft and cutting marks in the final version actually discourages students. 4. Should have mentioned clear standards for the class presentation such as strict time limits, restriction in choosing presentation topics as long as that fits with the class materials
- The professor did not have a convincing method of engaging students in discussions. Distributing 20% of the grade for class participation is very high especially for those students who feel shy to participate. In addition, class participation is not the only way of judging students's talents. If a student diffidently does not participate it does not mean she/he does not know anything or deserves to get a lower grade. Even and if the professor has strong interest with class participation, then he/she should have a strong motivation of convincing students too which the course's professor did not have.
